

## Features of PDFBox

- Extract Text
- Split and Merge - Split a single PDF into many files or merge multiple PDF files.
- Fill Forms - Extract data from PDF forms or fill a PDF form.
- Preflight - Validate PDF files against the PDF/A-1b standard.
- Print
- Save as Image
- Create PDFs
- Signing

## Milestones

- Submit UI Proposal – March 27<sup>th</sup>
- Submit UI Design Document – April 7<sup>th</sup>
- Have Presentation complete - March 30<sup>th</sup>
- Present – March 31<sup>st</sup>
- Have second Presentation complete – April 5<sup>th</sup>
- Present Second Time – April 7<sup>th</sup>
- Have Entire Project complete – April 24<sup>th</sup>

## Risks

- Procrastination
- Misunderstanding of the tools
- Problems uploading to GitHub
- Must feature takes longer to implement then intended
- Incompatible code

## Plans

- Develop clear milestones and stick to them, and meet weekly
- Read documentation and discuss among group how we think the tools work so we can clear up any misunderstandings, and test tools before we use them in project

- If there are problems with GitHub we can email each other ZIP files of what we have so that they can try to upload it and if GitHub fully fails we can use one drive as a backup
- Evaluate if there are future features that depend on those features, and prioritize features that will hold back project if not completed
- Establish how our objects are going to communicate with each other and test often

### Tasks

GUI Graphic Design – 3 Hours - Fletcher – MED - 0000

Design Elements – 3 Hours – Blake – HIGH - 0001

Paragraph Per Design Element – 2 Hours – Dustin – HIGH - 0010

Scenarios – 1 Hours – Dustin – MED - 0011
